

THE SHARK™ collapsible step cribbing

RESCUE 42 Innovative Tools for Extrication and Rescue

New from Rescue 42, **The Shark™** collapsible step cribbing will save critical storage space on your rig for more important equipment. Its innovative design is taller than most traditional step chocks, collapses to 5½" and provides a solid platform for vehicle stabilization.

The Shark's™ tough steel construction meets the 2:1 height to base ratio for vertical stability while positive grip teeth on the steps helps prevent slipping.

The Shark™ - Standard (SRK-S)

Perfect for Engines/Pumpers and smaller apparatus to stabilize lower clearance vehicles. Stands at 10" high, collapses to 5½" and weighs only 23 lbs.

The Shark™ - Large (SRK-L)

Made for Trucks, Squads and Rescues to stabilize higher clearance vehicles such as SUVs and Trucks. Stands over 16" high, collapses to 5½" and weighs 37 lbs.

	Standard	Large
