

# ML-28 Defender Spreader

- Premium quality components
- High strength field replaceable tips
- Star-grip control valve
- Aluminum alloy arms
- Dual pilot check valve

## Model 362R471

Looking for more power? Meet the Defender. Built for easy handling, the Defender boasts improved ergonomic features as well as a stargrip actuator with a stationary handle for easy fingertip actuation in the most compromising rescue situations. The enhanced power of the Defender provides a spreading force of 44,000 lbs. and a pulling force of 6,969 lbs. yet weighs in at a light 49 lbs.

### Applications

- Vehicle rescue applications
- Structural collapse
- Large-scale rescue situations including trainwrecks, aircraft emergencies and large truck/tractor accidents

### Features & Benefits

- Improved Ergonomics for easier handling
- Improved Power with a spreading force of up to 44,000 lbs
- Star-grip control valve actuator permits tool operation from almost any handling position
- Stationary handle with protected control valve
- Shielded pinch points provide extra protection for operator

- Light weight at only 49 lbs
- Premium quality components made from aircraft aluminum alloy
- Multi-functional tip design allows for spreading, pulling and sheet metal cutting without changing tips
- Provides superior performance for challenging modern rescues
- Field Replaceable Tips permit chain and shackle attachment without tip removal
